INTRODUCTION

In 2006 the Ministry of Panchayat Raj named Maldah one of the country's 283 most backward districts (out of a total of 640) It is one of the eleven districts in West Bengal currently receiving funds from the Backward Regions Grant Fund Programme (BRGF). No notable industry is made here. Most of the people of the district are agricultural laborer and unskilled laborer. According to Human Development Index, 7 districts of West Bengal state ranked far behind out of 19 districts. Maldah district is one of them. Though the Central and State Governments have launched numerous schemes and programmes for poverty amelioration, but it has not in any way changed or affected the condition of the people in Habibpur block of Maldah district. It is all due to their lack of awareness, information and illiteracy. The literacy levels are extremely poor. The dominant tribal culture is also gradually losing its identity due to lack of socio-political patronage and depletion of local sources of livelihood.

In the month of June 2021 SWI has launched the project named Empowered Communities foster Climate Adaptive Agriculture and Livelihoods in the district of Maldah at the proposed villages of the target Block of the district with the technical and financial support of MESSOREORS. The purpose of the project is reduction of socio-economic fissure between socially excluded and deprived communities such as Schedule Tribes & Schedule Caste community and the general population through non-discriminatory access to rights for livelihood, health and nutrition, in the target area of West Bengal by bringing into a sustainable, participatory and inclusive way through the process of empowerment for joining the mainstream of population. However, this would be done extensively through animation-based approach ensured by the mass participation of the target community members and households. However so far we have completed the first six months activities as per our physical and financial plan. This report will elaborate the status of the project so far with major outcomes achieved by the end of the 6 months as presets.

GOAL & OBJECTIVES

GOAL - Marginalized households of 3 gram Panchayat in West Bengal have improved their living Condition through greater Food Sovereignty and increased access to Government resources.

OBJECTIVE 01 - By 2024, 60% target households of 3 GPs in Habibpur block in Maldah district of West Bengal will have increased access to government resources/ schemes and entitlements.

OBJECTIVE 02 - 60% (2064 HH of 3440 HH) Marginal farmers of 3 Gram Panchayat in 1 blocks in West Bengal will have greater food sovereignty by 2024 through adopting

'Climate Adaptive Agriculture Practices (CAAP), optimum water resource management and marketing of produce through organized markets and networks To enhance the health & Nutrition status of women & child of the community.

OBJECTIVE 03- 40 % of community based organizations groups / committees of 3 GPs of Habibpur block in Maldah district of West Bengal have increased participation, ownership and support in management of village level governance and administration.

OBJECTIVE-03

40 % of community based organizations groups / committees of 3 GPs of Habibpur block in Maldah district of West Bengal have increased participation, ownership and support in management of village level governance and administration.

I. Formation of new SHG and strengthening of weak SHG (budgeted). - We have been conducted 10 meeting for formation and regular meeting of new SHGs. 211 women participated in those meeting. They are known as the benefits of formation a new SHG in this meeting and they are ready to formed new SHG.

J. Formation and strengthening of farmers group, farmers club, women farmers group - We have organized 6 awareness meeting for Formation and strengthening of farmers group, farmers club, women farmers group. 85 people are attending meeting. They have come to know about benefit of farmers clubs.

K. Linkage meeting between NABARD/ADA & farmers groups- We have organized 6 linkage meetings between ADA and farmers group, farmers club, women farmers group. 162 people are attending in our meeting. ADA discusses benefit of farmers club and various government schemes for farmers group.

L. Staff Capacity building

Two orientation and staff capacity building is done where staff came to know about the project objectives and their role responsibility in the project, inputs given on Govt. schemes etc. Their confidence increased to work.

Three capacity building training was conducted for staff in the beginning of the project. In the training resource person spoke about various Government Schemes such as Jononi Suraksha Yojana (JSY), ICDS, Old age pension, Family benefit schemes, Widow Pension, IAY (Indira Avas Yojana), MNREGS etc. He explained in detail that when and why it started and who are the beneficiaries, the allotted amount under each scheme, documents concerning the scheme and the mode of transmission of the allotted fund to the concerned beneficiaries. He mainly focused on Mahatma Gandhi National Rural Employment Guarantee Scheme-How to get the job card, what are the works that can be taken under this scheme.

M. Monthly Staff Meeting - 12 staff monthly meeting have been conducted every month in Social Welfare Institute. In these meeting coordinator used to collect monthly activity report and action plan for the next month. In each meeting a short input session has been provided to the team on reporting and monitoring, documentation including photo documentation so that all the good practices can be noted and recorded. Gradually the team of the field staffs are taking grip of the project with their updated skills and experiences.

N. Quarterly Review Meetings – SWI used to perform internal review meeting of their all projects half yearly basis so that each one of the SWI coordinator can be aware about their different projects and progress accordingly. It's basically sharing of project progress along with the major obstacles faced by the project teams. This helps in understanding of different situation of different projects that the project team is overcoming using common senses and their dynamisms. Leadership qualities of the coordinators and supervisors can also been experiencing in such meetings. Presentation of the projects status however, describe the presentation and documentation skills of the coordinator. Coordinators also collect the report and support the staffs.

CHALLENGES FACED

Major Challenges

- Social gathering/festival/marriage and election creates obstacles in conducting trainings, workshops and other programmes.
- Difficulties due to heavy rain and other natural calamities in this year has faced by the project team in performing different activating on proper time.
- Sometimes building rapport with the Govt. dept. and their officials has become a bigger problem than the normal. Since this project has a bigger opportunity in linkage with line Dept. so field team suffered a bit while doing that.
- Situation of COVID however did not created problems as such but major gathering for trainings, meetings has conducted with a prior permission.

Strategies adopted as Solutions

- Planning has been done in such a manner so that participants could attend the same in smooth. Some time we merged two different programme in a same day with different time frame as well.
- Climatic hazards has been handled with alternative days on engagement of the field staffs. They also had to sacrifice their holidays due to the same.
- This part of the problem basically managed by the coordinator and the field staffs in joint manner. Introductory meetings followed by regular follow up visits has slicker the process a lot.
- Proper precautions has been taken by the entire team while conducting field based programme. Vaccination of the community members was also given priority methodically.

AT A GLANCE

4.3	Monthly Review meeting.	12	12	72

CONCLUSION

All the efforts were made to complete and we have been successful completing of the project activities. Therefore we could already see some of the changes in the community body language. They respond well, respect our staff both in villages where we work and in the Govt. offices and respond well. From this we are confident to help people and successful completion. The project has a long term effect somehow some could be achieved immediately and some possibly after a year interval. This warrants high level of technical and managerial capabilities on the part of project implementing strategies. Among other things, NGO's local presence, availability of competent technical staff including networking with community and other stakeholders is creating technically and in a prompt manner. However, it was observed that after the initial exuberance and involvement in the project, the community become slowly and non-committal about the programmer's objectives.

As an implementing agency SWI has started this project with a new dynamism and enthusiasm. Since the project has been launched in total new geographical situation and place so people's participation is a bit low and are gradually increasing. The ownership of the project by the community is gradually increasing. Women participation has seen tremendously high from the very beginning even better than the men participation in many cases. Youth and involvement of other mixed section are comparatively low than women. The team of the field staff are also very new to this sectoral however they are also been given different trainings and a regular base input sessions to upgrade their skills and knowledge. Overall, with all the prose and cones, the project has started with a fresh and dynamic approach to achieve the objectives of the project in all revenues.

DRUPES OF HARD WORK

Successstory on **Kitchen garden-**

Name: Anjali Mardi

Vill: Bijoil

Dalla , Malda

Date : 17.03.2022

Ms. Anjali Mardi is a female small farmer; she belongs to poor ST (santal) community. We conducted an awareness program on Kitchen garden and using by bio- fertilizer at the village Bijoil . We give awareness to the people about how to make use of the land which are simply not in use. We suggest them to cultivate different kind of vegetables and reduce the expense of family expenditure. We always tell them to cultivate using Bio-fertilizer. Cultivating vegetables by Bio-fertilizers our health remains healthy and fit. Ms. Anjali Mardi attended our program and she liked it. She accordingly followed our suggestions and cultivated different types of fruits in her small area (16 Decimal land) . She basically cultivated 'Apple Kull' in her kitchen garden. The seed was provided for her from the project fund. Now fruits are ready to harvest to consume. She faithfully acknowledges that in this way she could save the small amount money for her family. Now she also contributes some things in her family.

THE TEST OF DRAGON

Success story on **Dragon Fruits cultivation-**

Name: Bikash Roy

Vill: Kiyol

Post : Kendpukur

Date : 02.12.2021

Bikash Roy is a farmer belongs to poor economically backward . He lives at Kiyol village. He has fertile land. We organize a multi and inter-cropping cultivation program at their village . He was present in our program, listened attentively and was inspired by the words of Project Co-ordinator Mr. Anjan Kr Biswas. Mr. Anjan Suggested Mr. Bikash Roy to cultivate 'Dragon Fruits' in his 12 Decimal land. Bikash Roy planted Dragon Fruits in her land. Now Plants are grown up in some of the plants flowers have bloomed and some have fruits. Bikash Roy is expecting some income from here. Bikash Roy is sincerely grateful to Project Co-ordinator and Social Welfare Institute, Raiganj for their stretching helping hand towards him.

THE MODERN FARMING BY OLD MAN

Success story on **Modern cultivation-**

Name :Andriyash Tudu

Vill:Khoribari

Post:KendaPukur

Dist :Malda

Date : 12.04.2022

Andriyash Tudu is a poor farmer belongs to backwards Santal family . He lives at Khoribari . We organize a multi and inter-cropping cultivation programme at their village . He was present in our programme and listened attentively and inspired by the words of Project Co-Ordinator Mr. Anjan Kr. Biswas .Mr. Anjan Kr. Biswas suggested to him to cultivate 'Brinjal seed's' .in his vacant land (One Bigha Only) .Now plants are grown up and bloomed vegetables and fruits , Andriyash is expecting some income from here and grateful to the project Co-Ordinator and Social Welfare Institute , Raiganj for their stretching helping hand towards him . He was also earned Rs- 50000/- from this farming .

THE TEST OF BANANA

Success story on **Banana cultivation-**

Name: Santana Hembram

Vill: Maivita

Santana is a poor farmer belongs to backward Santhal community. She lives just near Bangladesh border at Maivita village. She has barren land. We organize a multi and inter-cropping cultivation program at their village on 10th July-2021. She was present in our program, listened attentively and was inspired by the words of Project coordinator Mr. Anjan Kr Biswas. Mr. Anjan Suggested Mr. Santana to cultivate banana in her one bigha of land. Santana planted banana plants in her land. Now banana plants are grown up in some of the plants flowers have bloomed and some have bore fruits. Santana is expecting some income from here. Santana is sincerely grateful to Project coordinator and Social Welfare Institute, Raiganj for their stretching helping hand towards him.
